## LEGISLATIVE NEWS...

### New York

An amendment to New York City Local Law 196 has extended the deadline for the second compliance date of new construction site safety training to December 1, 2019 (previously June 1, 2019). The final date remains September 1, 2020. However, according to National Elevator Industry, Inc. Vice President for Codes & Safety, Kevin L. Brinkman, an OSHA 10 card (certifying the 10-hour class has been completed) is still required, and some local contractors are already requiring the additional training. The second compliance date will require an OSHA 30 card, with the final one requiring an OSHA 40 card, *The Real Deal* reported last week.

For more information visit:  
<https://www1.nyc.gov/site/buildings/safety/sst-safety.page>

## EEO-1 Reporting Changes and Deadlines

### Background

Businesses with at least 100 employees (and federal contractors with at least 50 employees and a contract of \$50,000 or more with the federal government) must file the EEO-1 form.

### What's Changed?

On April 25, 2019 a federal judge announced a ruling that will require employers to collect 2018 employee pay data by race, ethnicity and gender (**Component 2**) and submit it to the EEOC by September 30, 2019. Employers must pick a payroll period between October 1 and December 31. The revised EEO-1 form will require employers to report wage information from Box 1 of the W-2 form and total hours worked for all employees by race, ethnicity and sex. **\*Note:** Eligible employers are still required to file EEO-1 forms without pay data (**Component 1**) by May 31, 2019.

For more information, visit <https://www.eeoc.gov/employers/eeo1survey/index.cfm>.

# Announcing your 2019-20 Elected Officers

The NAEC Board of Directors recently met in Naples, Florida, with one of their duties being the election of the 2020 officers. We are excited to announce the slate below. Your new officers will be inducted at the Annual Awards Breakfast at the 70th Annual NAEC Convention and Expo in Grand Rapids, MI on Thursday, September 19, 2019. We hope to see you there!

**Donald Gelestino**  
President

Don Gelestino, President of Champion Elevator Corp. in New York City, has been in the elevator industry for 33 years. He began in 1986 as a field helper for DECO Elevator in Brooklyn. Don started Ver-Tech Elevator Co., Inc., in 1993 and sold the company in 2010 to United Technologies where he was employed by one of their entities for three more years. After a five year, non-compete, Don returned to the elevator service business opening Champion Elevator Corp. Don believes safety training and field training are among the biggest items the Association has to give its member an advantage. He is passionate about NAEC promoting the monitoring of Code and safety changes. All members need to be made aware of the best and latest way to help their employees and customers. Don and his wife, Nadine, have two children, Mia and Don Jr. Don enjoys spending time with his family, music, and the outdoors.

**Michael Frecking**  
Vice President

Michael Frecking, President of Lakeland/Larsen Elevator in Waukegan, Illinois, began his career in the elevator industry in October 2014 and became an integral part of running day to day operations of Lakeland/Larsen Elevator. Two years later, Michael became president of the company. A main point of concern for the industry is in regards to elevator monitoring vs. hands on maintenance. He believes in order for our industry to continue progressing, we must ensure codes are not written in a manner that allow elevator monitoring as hands on maintenance. "I believe me being the 'new comer' offers NAEC a fresh set of eyes and ears... yet being third generation in our family business, picking up where my father left off, I respect the industry and welcome NAEC's traditions." Michael and his wife, Jennifer, have one son, Michael. In his free time, Michael enjoys football, riding his motorcycle, grilling, and playing video games with his son.

**Rick Gable**  
Treasurer

Rick Gable, President of Gable Elevator, Inc. in Twinsburg, Ohio, has a Bachelor's of Science Degree from Kent State University. Rick started his career selling accessibility equipment. In 1991, along with his cousin Phil Isaac, he started Gable Accessibility, a company specializing in residential accessibility and equipment. Over the past 26 years, Gable Accessibility evolved into Gable Elevator, Inc. and has grown to a full-service commercial elevator company with over 50 employees serving the Northeast Ohio and Columbus, Ohio, areas. As an independent elevator company, Rick believes that one of the major industry issues confronting NAEC members is the pricing structure for full maintenance contracts, promoted by the majors, does not allow for general maintenance on the units. Rick enjoys golfing and spending time with his family, particularly fishing and jet-skiing.

**Kevin Flotten**  
Secretary

Kevin Flotten, National Sales and Strategic Accounts Manager for EMS Group, Inc., in St. Louis, Missouri, has over 19 years in the elevator industry. He began his career with EMS Group as an Inside Sales and Estimates Representative. Soon thereafter, he was promoted to Outside Sales Manager, where his continued growth and success led to his current role as Manager of Strategic Accounts for EMS Group. Before his time at EMS, Kevin dedicated eight years to serving our country in the U.S. Army. He believes the future of our industry lies in the knowledge and training passed along to the younger generation. Kevin enjoys golf and spending time with his wife, Amy Flotten, his five children, and grandchildren.

# ECNY 2019

The Elevator Conference of New York (ECNY) held its annual Supplier Showcase on April 10th this year at the Villa Barone Manor in Bronx, New York. The six-hour Tradeshow proved, once again, to be a success with over 120 exhibitors, showcasing new and innovative services and products, and over 800 attendees. This prominent event allows elevator professionals in the area to keep up with the latest technologies and ideas in the industry.

For more information about ECNY and their events, visit [www.ecnyweb.com](http://www.ecnyweb.com).

# KINGS III EMERGENCY COMMUNICATIONS

With 30 years in the industry, and 18 years as an NAEC member, Kings III Emergency Communications focuses on delivering peace of mind to elevator customers via code compliant emergency phone solutions, complete with perks not typically seen in elevator phone monitoring. At the heart of our business is our state of the art Emergency Dispatch Center (EDC). The Kings III EDC is on call 24/7/365 with a redundant backup center. What differentiates our team of operators is the advanced training required of them. This includes Advanced Emergency Medical Dispatcher (AEMD), HIPAA and CPR training. They handle entrapments daily and provide response in 175+ languages; something that becomes more and more invaluable as the country grows in population and culture. Our full-service package includes phone equipment, installation, lifetime maintenance and monitoring, bundled together to provide a convenient, hassle-free solution for elevator partners and customers alike.

In addition to best in class monitoring, two key benefits that stand out in Kings III's solution include our smart line seizure technology, which eliminates costly dedicated emergency phone lines, and our digital recording and storing of all calls. These features allow reduced risk, liability and costs for customers, while providing a concierge level service to tenants, employees and visitors.

Kings III runs its business with its core values always top of mind:

1. Honesty & Integrity
2. Service to the customer above all else
3. Do what is right.
4. Good enough is not good enough: Pursue excellence.
5. Encourage individual initiative and growth.

If you talk to someone on the Kings III Team, you'll quickly find our company's core values are more than words in an employee manual. These philosophies are instilled in team members with encouragement to live them daily. Kings III has quarterly company-wide recognition of those nominated by their peers for doing just that - going above and beyond their normal duties and practicing the company's core values in doing so.

Kings III has 140 team members and counting. We monitor 57,000+ help phones at over 37,000 customer sites across the U.S. The statistic we are most proud of, however, is our 97%+ customer retention.

Formerly a family-owned business, in 2017, Kings III was acquired by Rockbridge Growth Equity, a Detroit-based middle market private equity firm. Rockbridge recognized Kings III's value proposition and saw the opportunity for growth.

Kings III is led by CEO and Qualified Elevator Inspector (QEI), Dennis Mason. Mason has extensive experience in the elevator world, having owned southern California based Modern Elevator, which he eventually sold in 2002. He then served as a Las Vegas Project Manager for Lerch Bates and Associates, before joining Kings III in 2005. Over the years, Dennis has provided expert testimony in a number of elevator litigation cases and continues to maintain his elevator licenses. The greater executive team comes from all walks of life, with notable experience in security, telecom and central station management.

*Continued...*

mitigate risk and liability exposure and reduce their customers' phone line costs. Kings III is invested in the elevator industry and their familiarity with handling entrapment calls truly sets them apart.

Kings III offers an Elevator Partner Referral Program, built specifically to help elevator contractors offload the handling of their customer's elevator phone equipment and monitoring while sharing in the revenue. This allows elevator service providers to focus on what they do best all while offering their customers a best in class emergency monitoring solution that helps increase safety and reliability, manage client and passenger experience,

## Start Elevator

Start Elevator LLC is a family owned business established by John "Jack" O'Shea in 1992. Jack's commitment and work ethic is at the foundation of the company's success. Start Elevator is dedicated to providing comprehensive elevator maintenance, modernization, repair and testing services throughout the five boroughs, Westchester, Long Island and New Jersey.

Jack's goal is, and will always be, to achieve the highest level of client satisfaction through exceptional leadership at all levels, ongoing in-house safety training for all employees, quick response times, and complying with all applicable laws and regulations. His team of managers and supervisors each have over 25 years of industry experience.

Over the past five years, the company has grown immensely having acquired four local companies and now employing over 150 industry professionals. Our intention is to continue this success and growth in the coming years.

# THE NEXT LEVEL OF TRAINING

## THERE IS STILL TIME!

Announced earlier this year, Kings III and NAEC have partnered together to offer a VTMP scholarship program. Six individuals will receive a complimentary full delegate registration and two-night hotel accommodations to the 2019 NAEC Convention & Exposition, September 16-19, in Grand Rapids, Michigan.

Recipients will be able to attend all educational sessions, both days of the Expo, as well as the Welcome Reception, Breakfast Buffet, Celebrate NAEC Event, and Dregs Party.

**There are three scholarships left!** To qualify, candidates must graduate the program on or before August 1, 2019.

**For more information or questions please email [Britnee@naec.org](mailto:Britnee@naec.org) or call 770-760-9660.**

**Special thanks to  
Kings III Emergency Communications  
for their generous donation!**

**Become an  
NAEC APPROVED  
Continuing  
Education Provider**

NAEC has developed two certification programs:

- The CET™ Program, specifically designed for elevator technicians.
- The CAT™ Program, designed for accessibility and private residence lift technicians.

In order for a CET or CAT to maintain his/her certification, he/she must complete 10 (ten) contact hours of NAEC approved continuing education annually. Many technicians are also using continuing education to meet state requirements.

Does your company currently conduct an education program or educational seminar directly associated to the technical or safety content related to elevator technicians? Would you like for your program to be included in the list of approved NAEC Continuing Education programs provided to technicians across the country and listed on the NAEC website?

Please be aware that self improvement, motivational, management, supervision courses, or courses or activities that are primarily advertisements or sales promotions in nature will not be accepted.

**Call 770.760.9660 or email [Darrah@naec.org](mailto:Darrah@naec.org) for more information.**

# Your Safety Manager is on Your Side

*By Ray Downs, Sr. VP of Environmental Health and Safety of TEI Group, NAEC Educational and Safety Committee and Alternate NEII Safety Committee Liaison; and By Robert Pitney, Director, of TEI Group*

*Published by Elevator World*

Did you ever wonder what it takes to be a safety manager in today's elevator industry? Well, we can tell you it's a position that frequently doesn't get the level of respect it deserves. At times, it is put to the side until something unfortunate happens. We would like to introduce you to our industry's safety managers.

Just like everyone else, they get up early and head to work. They arrive at their jobsite for the day. It could be a trailer, a shanty in a field or an office. Their day could start by conducting a training class for field employees in the office, performing a walk-through safety inspection in the field or preparing a site-specific safety plan that needs to be submitted with the next bid proposal. They could also be responsible for attending the general contractor's weekly site safety meeting among all trades.

We all know it's often a struggle to get to safety-training classes on time, let alone stay focused for their duration. Not to worry; you signed the attendance sheet and will receive credit for attending. How about your cellphones and text messages? Are they more important than paying attention to the meeting's topics that can save your life? Still, your safety manager keeps the class moving along.

When your safety manager arrives on a jobsite and starts his or her daily walk-through, it seems everyone knows the safety person is there. Field workers put on their safety glasses and hard hats so they don't get in trouble, right?

When the safety manager observes an unsafe condition or an unsafe act, they will take the time to stop the job and talk to the employee(s) to see if there is a safer way to perform the task. He or she may start out by asking, "How is your family?" because you come to work to support that family. In these moments, your safety manager may ask this simple question: "Why weren't you following company or industry safe work practices?" Better still: "Why didn't the team pre-plan the job safely (think job-hazard analysis) before attempting to perform that task?"

How about when the safety manager walks a building on a maintenance or service contract and observes unsafe conditions? They don't turn their heads like many may, managers included. No - they take a photo with their phone, prepare a corrective action plan and forward it to the building representative for review and implementation.

Safety managers do not run into burning buildings or get shot at, but they do understand that training, education and enforcement of safe work practices help save lives. We all know the elevator industry is a dangerous trade. We have to work at great heights and in blind hoistways. We sometimes need to troubleshoot with the power on. We get on top of cars or go into pits to make sure roller guides or compensation sheaves are working properly. And we climb ladders to reach the counterweight frame during a 2:1 roping task. These are just a few of the activities we all recognize as highly dangerous aspects of our trade.

Your safety manager investigates accidents when they take place. They work with others to determine the root cause so your company can take the necessary preventive measures to reduce the potential for reoccurrence. They also complete workers' compensation paperwork so you and your family can receive these benefits, sometimes crucial to staying financially viable while out of work.

This is all part of being a safety professional. To those safety managers making sure your fellow employees are educated and trained, and receive the necessary personal protective equipment to do their jobs without fear of being injured, we would like to say, "Thank you."

We would also like to thank all those in the field who follow safe work practices and the nine safety absolutes. And, to our senior elevator mechanics who mentor apprentices (the future of our industry), who guide and teach them how to perform their jobs safely, thank you, too.

So, when your job is behind schedule, money is flying out the door, and the safety guy arrives and has to stop your job because he observes something unsafe, that's when you should appreciate your safety manager. By stopping the job, that safety professional could be saving your life or the life of a colleague.

Being in the safety profession for more than 30 years, we know firsthand it can be a thankless job, but it is one we would never trade. In closing, please remember your safety manager is on your side when he comes to your jobsite for one reason: to make sure everyone is working safely and gets to go home to their family safely.

A tip of our safety hardhats to all those in the elevator safety profession for a job well done. You do make a difference!

## EESF Kicks Off Annual Campaign

Thanks to broad industry support, the Elevator and Escalator Safety Foundation (EESF) has been able to reach millions of children in the United States and Canada, through its Safe T Rider program. Adults and seniors, too, have benefited from the Rise Up Safe Riders and A Safe Rider programs.

EESF's goal is to educate the public on the safe and proper use of elevators, escalators and moving walkways. This year, EESF will create a new strategic direction, with an eye toward improving its current programs and developing new resources to expand its reach and make a positive impact on rider safety statistics.

EESF is working toward the day when safely riding an elevator, escalator or moving walkway is second nature. **Please support this effort by making your donation at [eesf.org](https://eesf.org).** Let's make everyone a safe rider!

For more information, contact Shelly Johnson, EESF Executive Director, at [shelly@eesf.org](mailto:shelly@eesf.org) or Laurie Dueitt, EESF Program Director, at [laurie@eesf.org](mailto:laurie@eesf.org).

325 Morgan Avenue  
Mobile, AL 36606

## The Elevator Association of Minnesota (EAM) Scholarship Program is **NOW OPEN**

The Elevator Association of Minnesota (EAM) is now accepting applications for their Scholarship Program. EAM has been working with International Scholarship and Tuition Services, Inc. (ISTS) to streamline the application process and are excited to say that the application is all online!

**EAM will award 2 scholarships again this year. One scholarship will be designated for high school seniors, the other for current undergrads, if a qualified applicant is available. If not, ISTS may award both scholarships to the same applicant pool.**

### Who is eligible to apply?

- High school seniors or current undergrads who plan to enroll in a full-time undergraduate study or enrolled in an accredited two-year or four-year college, university, vocational-technical or trade school for the entire upcoming academic year
- Dependent son or daughter of an active EAM member
- Those who have a parent/guardian who is an active EAM member at the time awards are announced
- Applicants who are not previous winners of the Elevator Association of Minnesota scholarship

### Eligible applicants must follow the steps below to apply:

1. Go to <https://aim.applyists.net/EAM> (Program Key: EAM)
2. Create an account, or login if you already have an account.

If you have any questions about the application process, you may contact ISTS toll free 855-670-ISTS (4787) or by emailing [contactus@applyISTS.com](mailto:contactus@applyISTS.com) (Subject Line: EAM).

If you would like to donate to the EAM Scholarship fund, visit [elevatorassocmn.org](https://elevatorassocmn.org). For questions about the Scholarship Program, please email [nikki.smith@meiusa.com](mailto:nikki.smith@meiusa.com).

In observance of  
**INDEPENDENCE DAY,**  
 we will be closed on  
**THURSDAY & FRIDAY,**  
 July 4th & 5th.

## In Memoriam

Edward L. Bonardi, 84, of Orangeburg, NY, passed away at home surrounded by his family on Tuesday, April 30, 2019.

Edward was a U.S. Army Veteran and an icon in the Elevator Industry as owner and founder of Archer Elevator Co.

He is survived by his wife Jeanette; sons Michael; Steven, his wife Christine; and Richard and his wife Virginia; and his grandchildren Joseph, Eric, Julia, Alexandra, Christopher and Sophia.

Ed was a longtime member of the Blauvelt Sons of Italy Lodge 2176 where he was past VP and reigning bocce champion along with his sons. He was also an avid hunter and golfer, having scored a hole in one twice. He will be remembered for his smile, his compassion and his generosity.
